

UČNI NAČRT PREDMETA / COURSE SYLLABUS

Predmet: **Izbrana poglavja iz ekotoksikologije**

Course title: **Selected topics in Ecotoxicology**

Študijski program in stopnja Study programme and level	Študijska smer Study field	Letnik Academic year	Semester Semester
Doktorski študij Ekološke znanosti, 3. stopnja Doctoral Study Ecological Sciences, 3rd degree		1. ali 2.; 1st or 2nd	1.- 4.; 1st-4th

Vrsta predmeta / Course type

Izbirni/Elective

Univerzitetna koda predmeta / University course code:

Predavanja Lectures	Seminar	Vaje Tutorial	Lab. vaje Laboratory work	Terenske vaje Field work	Samost. delo Individ. work	ECTS
25	5				150	6

Nosilec predmeta / Lecturer: Julija Volmajer Valh

Jeziki / Languages:	Predavanja / Lectures: slovenski / Slovene
	Vaje / Tutorial: slovenski / Slovene

Pogoji za vključitev v delo oz. za opravljanje študijskih obveznosti:

Poznavanje kemije in biokemije na ravni univerzitetnega programa.

Knowledge of chemistry and biochemistry at graduate level.

Vsebina:

Definicije v ekotoksikologiji

Tipi onesnaževanja okolja:

- Kovine
- Nekovine
- Organske snovi
- Organokovinske snovi

Načini vnosa določenih onesnaževal v ekosisteme.

Content (Syllabus outline):

Definitions in ecotoxicology

Different pollutants:

- Metals
- Non-metals
- Organic compounds
- Organometallic compounds

Entry of specific pollutants in ecosystems;
Study of mechanisms of some selected

Mehanizmi delovanja nekaterih izbranih onesnaževal.
Napredne analizne metode v ekotoksikologiji in ocena tveganja za različne onesnaževalce nizkih koncentracij.
Biomarkerji in biosenzorji.

pollutants;
Advanced testing in ecotoxicology and risk assessment of chemicals of low doses;
Biomarkers and biosensors.

Temeljni literatura in viri / Readings:

Visser, J.E., Ecotoxicology Around the Globe, 2010, Nova Science Publishers, Incorporated
Various scientific papers chosen according to selected topics.

Cilji in kompetence:

Znati tipe onesnaževal, njihovo razporejanje v ekosistemih. Identificirati učinke onesnaženja v nizkih koncentracijah na populacije in ekosisteme. Razumeti oceno tveganja in delovanje biomarjerjev in biosenzorjev.
Zmožnost izvedbe različnih testov toksičnosti.

Objectives and competences:

Students learns:
Various types of pollutants and their distributions in ecosystems
Testing metodes in ecotoxicology
Effects of opllutans of low concentrations on populations and ecosystems
Risk assesment
Biomarkers and biosenzors
Know the types of pollutants and their distribution in ecosystems. Identify the effects of low-level pollution on populations and ecosystems. Understand risk assessment and the performance of biomarkers and biosensors.
Be able to perform different toxicity tests.

Predvideni študijski rezultati:**Znanje in razumevanje:**

Ob koncu tega predmeta bodo študentje zmožni:
Ugotoviti učinke onesnaženja na populacije in ekosisteme. Sklepati o nekaterih mehanizmih v ekotoksikologiji. Zmožnost samostojne izvedbe zastavljenih testov toksičnosti. Pojasniti delovanje biomarjerjev in biosenzorjev.

Prenesljive/ključne spremnosti in drugi atributi:**Intended learning outcomes:****Knowledge and understanding:**

By the end of this course, students will be able to:
Determine the effects of pollution on populations in ecotoxicology. Be able to independently perform biomarkers and biosensors.

Transferable/Key Skills and other attributes:

- Communication skills

- | | |
|--|---|
| <ul style="list-style-type: none"> - Spretnosti komuniciranja - Reševanja problemov - Aktivno sodelovanje pri predavanjih - Spretnosti priprave seminarских nalog in javnega nastopanja - | <ul style="list-style-type: none"> - Problems solving ability - Collaboration during lectures - Active participation in lectures - Ability to prepare a seminar work and public presentations |
|--|---|

Metode poučevanja in učenja:

- | | |
