Nosilec predmeta / Lecturer:	Nataša Vaupotič
------------------------------	-----------------

Jeziki / Languages:	Predavanja / Lectures: slovenski/Slovenian
	Vaje / Tutorial:

Pogoji za vključitev v delo oz. za opravljanje študijskih obveznosti: Ni pogojev. Priporočeno je predznanje iz klasične in moderne fizike in fizike trdne snovi.	Prerequisites: None. Preknowledge of classical and modern physics and solid state physics is recommended.
---	---

Vsebina: Obravnavani bodo aktualni primeri s področja fizike mehke snovi. Predavanja bodo pokrivala področja raziskav osnovnih principov kot tudi področje aplikacij. Izbrane vsebine se bodo prilagajale področju znanstvenoraziskovalnega dela doktorskega študenta. Primeri vsebin: kontinuumski in diskretni modeli (različne vrste tekočih kristalov, koloidi, polimeri...), naravna, inducirana in struktturna kiralnost, optične, toplotne, električne, magnetne in mehanske	Content (Syllabus outline): Recent advances in soft matter physics will be studied. The lectures will cover research of basic principles and also of applications. Topics will be chosen in accordance with the candidate's research work. Examples of topics: continuum and discrete models (for different phases of liquid crystals, colloids, polymers...), natural, induced and structural chirality; optical, thermal, electric, magnetic and mechanical properties of soft matter materials, theoretical

- 7) Znanstvenoraziskovalni članki s področja obravnavanih tem/ Scientific research papers from chosen topics.

Cilji in kompetence:

Namen predmeta je študente usposobiti za raziskovalno delo na izbranem področju fizike mehke snovi.

Objectives and competences:

The objective of this course is to teach students how to carry out research work on a selected field within soft matter physics.

Predvideni študijski rezultati:

Znanje in razumevanje:

Po zaključku tega predmeta bo študent zmožen:

- analizirati, vrednotiti in primerjati najnovejše raziskave na izbranem področju fizike mehke snovi;
- uporabiti napredno fizikalno znanje in matematične metode na danem področju za analizo in vrednotenje fizikalnih pojavov v odvisnosti od relevantnih fizikalnih parametrov in spremenljivk;
- prepoznati analogije med različnimi pojavili in jih uporabiti za obravnavo novih pojavov.

Prenesljive/ključne spremnosti in drugi atributi:

Intended learning outcomes:

Knowledge and understanding:

On completion of this course the student will be able to:

- analyse, evaluate and compare the latest research on a chosen field of soft matter physics;
- use advanced physical knowledge and mathematical methods from a specific field for an analysis and evaluation of physical effects as a function of physical parameters and variables;
- recognise analogies among different effects and apply them to describe novel physical effects.

Transferable/Key Skills and other attributes:

- | | |
|---|---|
| <ul style="list-style-type: none"> - <i>Spretnosti komuniciranja:</i> ustno in pisno izražanje pri predstavitev izbrane teme. - <i>Uporaba informacijske tehnologije:</i> uporaba programskega orodja za modeliranje in obdelavo podatkov. - <i>Reševanje problemov:</i> prepoznavanje univerzalnosti, analogij in celosten pristop k reševanju problemov. | <ul style="list-style-type: none"> - <i>Communication skills:</i> manner of expression at written and oral presentation of a chosen topic. - <i>Use of information technology:</i> use of software tools for modelling and data manipulation. - <i>Problem solving:</i> ability to recognize universalities, analogies, and global approach to solving problems. |
|---|---|

Metode poučevanja in učenja:

Predavanja, seminarji, konzultacije, razlaga, razgovor, delo s tekstrom, metoda pisnih in grafičnih del, problemsko učenje, študija primera, raziskovalno učenje, uporaba programskega orodja.

Learning and teaching methods:

Lectures, seminars, tutorials, explanation, discussion, work with text, work with graphic elements, case study, problem based learning, inquiry based learning, use of software tools.

Delež (v %) /

Načini ocenjevanja:

Način (pisni izpit, ustno izpraševanje, naloge, projekt)

4 seminarji

Delež posameznega seminarja je 25%, vsak mora biti ocenjen pozitivno.

Weight (in %)

100%

Assessment:

Type (examination, oral, coursework, project):

4 seminars

Each seminar contributes 25% and each has to be marked positive.
