

**UČNI NAČRT PREDMETA / SUBJECT SPECIFICATION**
**Predmet:** Robotika

**Subject Title:** Robotics

Študijski program Study programme	Študijska smer Study field	Letnik Year	Semester Semester
Tehnika – področje izobraževanja, 3. stopnja		2	zimski/poletni
			ali
		3	poletni
Education in Engineering, 3 <sup>rd</sup> cycle		2	winter/summer
			or
		3	summer

**Univerzitetna koda predmeta / University subject code:**

Predavanja Lectures	Seminar Seminar	Sem. vaje Tutorial	Lab. vaje Labor work	Teren. vaje Field work	Samost. delo Individ. work	ECTS
10	5				75	3

**Nosilec predmeta / Lecturer:** Karl Gotlih

**Jeziki / Languages:** Predavanja / Lecture: Slovenščina / Slovene  
 Vaje / Tutorial:

**Pogoji za opravljanje študijskih obveznosti:**

Ni posebnih pogojev

**Prerequisites:**

No prerequisites

**Vsebina:**

Predmet Robotika podaja znanja, ki so potrebna pri razumevanju, načrtovanju in konstrukciji elementov robotskih sistemov in robotiziranih tehničnih sistemov v celoti. Obravnavane bodo osnovne teme, kot so geometrija, kinematika in dinamika sistemov, direktna in inverzna kinematika in dinamika, singularnost, robotski elementi, prijemala, orodja, periferija. V vseh navedenih primerih so ob teoretičnih osnovah podani tudi praktični primeri. Obravnavane so tudi osnove krmilij, načini programiranja, servisiranja ali vzdrževanja.

**Content (Syllabus outline):**

The subject Robotics gives the knowledge, which is important for understanding, planning and designing of elements of a robotic technological system. Given are basic chapters of geometry, kinematics and dynamics of systems, direct and inverse kinematics and dynamics, singularities; robot elements, grippers, tools, outer devices. Parallel to the theoretical background are presented practical exercises for illustration. Included in the subject are also basics in control theory, programming and maintenance.

**Temeljni literatura in viri / Textbooks:**

- LENARČIČ, Jadran, BAJD, Tadej. Robotski mehanizmi. 1. izd. Ljubljana: Fakulteta za elektrotehniko, 2003.
- ANGELES, Jorge: Fundamentals of robotic mechanical systems. Springer, 2003.
- VDI 2740 Blatt1: Greifer für Handhabungsgeräte und Industrieroboter, 1995.
- EU 2006/42, ISO 8373, ISO 10218-1, ISO 10218-2, ISO 15066, ISO 12100

#### Cilji:

- študent bo osvojil poglobljena znanja s področja teorije in funkcionalne uporabe robotov;
- osvojene metode in spretnosti omogočajo študentu vpeljavo robotov v industrijske in neindustrijske aplikacije.

#### Objectives:

- the student will master detailed knowledge in the theoretical field and the functional use of robots;
- Learned methods and skills allow the student the implementation of robots into industrial and non-industrial applications.

#### Predvideni študijski rezultati:

##### Znanje in razumevanje:

- uporabe robotov in njihove aplikacije v industrijski ali servisni sistem;
- integriranja osnovnih principov delovanja sistema kot več-masnega vodenega sistema;
- konstruiranja sistema z robotom;
- načrtovanja dela z industrijskim robotom;
- vrednotenje različnih konceptov in sistemov z roboti;

##### Prenesljive/klučne spretnosti in drugi atributi:

*Spretnosti komuniciranja:* ustni zagovor laboratorijskih vaj, pisno izražanje pri pisnem izpitu.

*Uporaba informacijske tehnologije:* uporaba programskih orodij za programiranje robotov.

*Reševanje problemov:* načrtovanje nalog za robota.

*Delo v skupini:* skupinsko delo pri laboratorijskih vajah.

#### Intended learning outcomes:

##### Knowledge and understanding:

- use of robots and its applications in industrial or service systems;
- integration of basic principles of a multibody controlled system;
- designing a system with robots;
- planning of work with industrial robots;
- evaluation of different concepts and systems with robots

##### Transferable/Key Skills and other attributes:

*Communication skills:* oral lab work defence, manner of expression at written examination.

*Use of information technology:* use of programming tools for robot programming.

*Problem solving:* design of robot tasks.

*Working in a group:* group work at the lab work.

#### Metode poučevanja in učenja:

- predavanja
- dialog
- praktično delo na vajah

#### Teaching and learning methods:

- lectures
- dialogue
- practical laboratory work

#### Načini ocenjevanja:

Delež (v %) /  
Weight (in %)

##### Način (pisni izpit, ustno izpraševanje, naloge, projekt):

- pisni izpit iz teorije,
- izdelana seminarska naloga (pisno).

##### Assessment methods:

- |    |    |  |
|----|----|--|
| 50 | 50 | Type (examination, oral, coursework, project):   |
|    |    | <ul style="list-style-type: none"> <li>written examination of the theory,</li> <li>written semira work.</li> </ul> |

#### Materialni pogoji za izvedbo predmeta:

- Predavalnica,
- Laboratorij za robotizacijo

#### Material conditions for subject realization:

- Classroom
- Laboratory for robotisation

#### Obveznosti študentov:

##### Pisni izpit, ustni izpit, domače naloge, projekti:

#### Student's commitments:

##### Written examination, oral examination, coursework, proje

- pisni izpit iz teorije,
- izdelana seminarška naloga (pisno).

- written examination of the theory,
- written seminar work.
