

UČNI NAČRT PREDMETA / SUBJECT SPECIFICATION
Predmet: Alternativne energije in energetika

Subject Title: Alternative Energy and Energetic

Študijski program Study programme	Študijska smer Study field	Letnik Year	Semester Semester
Tehnika – področje izobraževanja, 3. stopnja		2	zimski / poletni
			ali
		3	poletni
Education in Engineering, 3 rd cycle		2	winter / summer
			or
		3	summer

Univerzitetna koda predmeta / University subject code:

Predavanja Lectures	Seminar Seminar	Sem. vaje Tutorial	Lab. vaje Labor work	Teren. vaje Field work	Samost. delo Individ. work	ECTS

Nosilec predmeta / Lecturer: Boris Aberšek

Jeziki / Languages: Predavanja / Lecture: Slovenščina / Slovene
 Vaje / Tutorial:

Pogoji za opravljanje študijskih obveznosti:

Osnovno znanja o energijah in energetiki

Prerequisites:

Basic knowledge of energy and energy production.

Vsebina:
Predavanja:

- Konvencionalni in alternativni viri energije;
- Konvencionalne in nekonvencionalne oblike pridobivanja energij;
- Energetika in okolje;
- usklajevanje želja, potreb in možnosti v energetskem sektorju;
- Energetika v prihodnosti - scenarijih;
- Uporaba sodobnih nano tehnologij na področju energetike,
- Energetika in transport;
- Energetika in planet zemlja.

Seminar:

Seminar aplikativno dopoljuje vsebino predavanj z reševanjem praktičnih izzivov in problemov.

Content (Syllabus outline):
Lectures:

- Traditional and alternative source of energy;
- Traditional and alternative way of energy production;
- Energy and surrounding;
- reconciliation of wish and possibilities at the energetic sector;
- Energy in future - scenarios;
- Use of advance nano technologies at the energetic sector;
- Energy and the transport;
- Energy and the planet Earth.

Seminar:

Seminar work supplements the lectures with the solutions of the practical problems.

Temeljni literatura in viri / Textbooks:

- Aberšek, B., *Energije in energetika*, Pedagoška fakulteta, Maribor, 1999
Berinstein, P., *Alterantive Energy: facts, Statistic, and Issue*, Oryx Press, 2007
Myer Kutz, M. (2007). *Environmentally Conscious Alternative Energy Production*. John Wiley & Sons, Inc.
Boyle, G., *Renewable Energy*, Oxford University Press, 2004
Medved, s., Novak, P. *Varstvo okolja in obnovljivi viri energije*, Ljubljana, Fakulteta za strojništvo, 2000

Cilji:

analizirati in evalvarti znanja in informacij o sodobnih obnovljivih virih energije v tehnični praksi ter sodobnih tehnologijah, ki se danes vse pogosteje uporablajo za pridobivanje in pretvarjanje in shranjevanje energij;
analizirati poglobljeno teoretično znanje s področja vrednotenja in izbire posameznih emergentov in njihovega izkoriščanja;
analizirati praktično uporabo predhodno pridobljenih teoretičnih znanj na praktičnih primerih s posebnim poudarkom na varovanje okolja varnem in varčnem koriščenju energije;
spodbujati študente k kreativnemu in samostojnemu razmišljanju in razvijanju sposobnosti za kreativno reševanje inženirskih problemov s področja energetike in ekologije.

Objectives:

To analyse and evaluate knowledge and information about new renewable energy sources used in technical praxes as modern technologies, used for production, transformation and accumulation of energies;
to analyse detailed theoretical knowledge from area of assessment and selection of different energy sources and their exploitations;
to analyse practical use of previously accumulated theoretical knowledge on the practical examples with specially stress on the ecology and safe and economical use of energy;
to encourage the students to creative and independent thinking for developing and solving different problems from power supplied and ecology.

Predvideni študijski rezultati:Znanje in razumevanje:

razumeti in evalviratisplošne napotke in pravil za izbiro emergentov in ustreznih energetskih prevornikov;
razumevanje načinov za učinkovito načrtovanje energetskega procesa;
razumevanje metod in smernic za tehnološki razvoj energetike;
razumevanje in kritično presojanje soodvisnosti med proizvodnjo energije in varovanjem okolja;
evalviranje sodobnih računalniških metod za tehnološko načrtovanje energetske proizvodnje;
razumevanje sovisnosti različnih znanj in postopkov ter pomena uporabe strokovne literature in računalniških sistemov za učinkovito reševanje praktičnih problemov.

Prenesljive/ključne spremnosti in drugi atributi:

uporaba informacijske tehnologije: uporaba orodij za izdelavo predstavitev energetskih načrtov;
reševanje problemov: ocenjevanje obstoječih in lastnih tehnoloških rešitev;
kombinirana uporaba različnih znanj za reševanje praktičnih problemov;

Intended learning outcomes:Knowledge and understanding:

understanding and evaluation of general instructions and rules for selecting energy sources and suitable power technologies;
understanding for effective planning of power supplied technologies;
understanding of methods and guidelines for technological power production development;
Understanding about connection between energy production and environment prevention;
evaluation of advanced computer aided methods for technological planning of the power production;
understanding of relationships between different skills and procedures and importance of professional literature and computer systems for efficient solutions of practical problems.

Transferable/Key Skills and other attributes:

use of information technology: use of tools for creating and designing technological power process;
problem solving: evaluation of existing and proper program solutions;
combined use of different skills for solution of practical problems;

načrtovanje tehnologije za pridobivanje energij z uporabo sodobnih metod.

design of technology for production of energy using advanced approaches.

Metode poučevanja in učenja:

frontalna predavanja,
skupinsko delo;
izdelava seminarske naloge,
diskusije v elektronskem forumu,
e-učenje.

Teaching and learning methods:

frontal lectures,
work in small groups;
seminar work,
discussion in electronic forums,
e-learning.

Načini ocenjevanja:

Način (pisni izpit, ustno izpraševanje, naloge, projekt):

diskusije v elektronskem forumu,
seminarska naloga,
pisni izpit,
ustni izpit.

Delež (v %) /
Weight (in %)

20 %
40 %
20 %
20 %

Assessment methods:

Type (examination, oral, coursework, project):

discussion in electronic forums,
seminar work,
written examination,
oral examination.
